

Statement of Applicability (SoA)

Version date: 29-9-2025

Introduction

This statement contains an overview of all ISO 27001:2022 Annex A Control Measures, indicating for each control whether it is applicable or not, and whether the control has been implemented in our organization. If a control is excluded, a brief explanation is provided.

Scope description

The scope of our information security management system (ISMS) is:

'Providing IT services for the end-to-end supply chain of Technische Unie', given the Statement of Applicability version 2.0, dated 29 september 2025

Management measures

No. (ISO 27001:2022)	Description norm requirement	Reason for selection				Applicable? Yes / No	Implemented? Yes / No
		Legislation	Contractual	Best practice	Risk		
A05	organizational controls						
A5.1	<u>Policies for information security</u> Information security policies and subject-specific policies shall be defined, approved by management, published, communicated to and recognised by relevant personnel and stakeholders, and reviewed at planned intervals and as significant changes occur.	X		X	X	Yes	Yes
A5.2	<u>Information security roles and responsibilities</u> Roles and responsibilities in information security shall be defined and assigned according to the needs of the organization.	X		X	X	Yes	Yes
A5.3	<u>Segregation of duties</u> Conflicting duties and conflicting areas of responsibility shall be segregated.			X	X	Yes	Yes
A5.4	<u>Management responsibilities</u> Management shall require all staff to apply information security in accordance with the organization's adopted information security policy, subject-specific policies and procedures.			X	X	Yes	Yes
A5.5	<u>Contact with authorities</u> The organization shall establish and maintain contact with relevant authorities.	X		X	X	Yes	Yes
A5.6	<u>Contact with special interest groups</u> The organization shall establish and maintain contacts with special interest groups or other specialised security forums and professional associations.			X	X	Yes	Yes
A5.7	<u>Threat intelligence</u> Information relating to information security threats shall be collected and analysed to produce threat intelligence.			X	X	Yes	Yes
A5.8	<u>Information security in project management</u> Information security shall be integrated into project management.	X		X	X	Yes	Yes
A5.9	<u>Inventory of information and other associated assets</u> An inventory of information and other associated assets, including owners, shall be developed and maintained.	X		X	X	Yes	Yes
A5.10	<u>Acceptable use of information and other associated assets</u> Rules for the acceptable use of and procedures for handling information and other associated assets shall be identified, documented and implemented.	X		X	X	Yes	Yes
A5.11	<u>Return of assets</u> Personnel and other interested parties as appropriate shall return all the organization's assets in their possession upon change or termination of their employment, contract or agreement.	X		X	X	Yes	Yes
A5.12	<u>Classification of information</u> Information shall be classified according to the information security needs of the organization based on confidentiality, integrity, availability and relevant interested party requirements.	X		X	X	Yes	Yes
A5.13	<u>Labelling of information</u> An appropriate set of procedures for information labelling shall be developed and implemented in accordance with the information classification scheme adopted by the organization.	X		X	X	Yes	Yes
A5.14	<u>Information transfer</u> Information transfer rules, procedures, or agreements shall be in place for all types of transfer facilities within the organization and between the organization and other parties.	X		X	X	Yes	Yes
A5.15	<u>Access control</u> Rules to control physical and logical access to information and other associated assets shall be established and implemented based on business and information security requirements.	X		X	X	Yes	Yes
A5.16	<u>Identity management</u> The full life cycle of identities shall be managed.			X	X	Yes	Yes
A5.17	<u>Authentication information</u> Allocation and management of authentication information shall be controlled by a management process, including advising personnel on appropriate handling of authentication information	X		X	X	Yes	Yes
A5.18	<u>Access rights</u> Access rights to information and other associated assets shall be provisioned, reviewed, modified and removed in accordance with the organization's topic-specific policy on and rules for access control.	X		X	X	Yes	Yes
A5.19	<u>Information security in supplier relationships</u> Processes and procedures shall be defined and implemented to manage the information security risks associated with the use of supplier's products or services	X		X	X	Yes	Yes
A5.20	<u>Addressing information security within supplier agreements</u> Relevant information security requirements shall be identified and agreed with each supplier based on the type of supplier relationship.	X		X	X	Yes	Yes
A5.21	<u>Managing information security in the information and communication technology (ICT) supply chain</u> Processes and procedures shall be defined and implemented to manage the information security risks associated with the ICT products and services supply chain	X		X	X	Yes	Yes

A5.22	<u>Monitoring, review and change management of supplier services</u> The organization shall regularly monitor, review, evaluate and manage change in supplier information security practices and service delivery			X	X	Yes	Yes
A5.23	<u>Information security for use of cloud services</u> Processes for acquisition, use, management and exit from cloud services shall be established in accordance with the organization's information security requirements			X	X	Yes	Yes
A5.24	<u>Information security incident management planning and preparation</u> The organization shall plan and prepare for managing information security incidents by defining, establishing and communicating information security incident management processes, roles and responsibilities.	X		X	X	Yes	Yes
A5.25	<u>Assessment and decision on information security events</u> The organization shall assess information security events and decide if they are to be categorized as information security incidents.			X	X	Yes	Yes
A5.26	<u>Response to information security incidents</u> Information security incidents shall be responded to in accordance with the documented procedures.	X		X	X	Yes	Yes
A5.27	<u>Learning from information security incidents</u> Knowledge gained from information security incidents shall be used to strengthen and improve the information security controls.			X	X	Yes	Yes
A5.28	<u>Collection of evidence</u> The organization shall establish and implement procedures for the identification, collection, acquisition and preservation of evidence related to information security events.	X		X	X	Yes	Yes
A5.29	<u>Information security during disruption</u> The organization shall plan how to maintain information security at an appropriate level during disruption.			X	X	Yes	Yes
A5.30	<u>ICT readiness for business continuity</u> ICT readiness shall be planned, implemented, maintained and tested based on business continuity objectives and ICT continuity requirements.	X		X	X	Yes	Yes
A5.31	<u>Legal, statutory, regulatory and contractual requirements</u> Legal, statutory, regulatory and contractual requirements relevant to information security and the organization's approach to meeting them shall be identified, documented and kept up to date.			X	X	Yes	Yes
A5.32	<u>Intellectual property rights</u> The organization shall implement appropriate procedures to protect intellectual property rights.	X		X	X	Yes	Yes
A5.33	<u>Protection of records</u> Records shall be protected from loss, destruction, falsification, unauthorized access and unauthorized release.			X	X	Yes	Yes
A5.34	<u>Privacy and protection of personal identifiable information (PII)</u> The organization shall identify and meet the requirements regarding the preservation of privacy and protection of PII according to applicable laws and regulations and contractual requirements.	X		X	X	Yes	Yes
A5.35	<u>Independent review of information security</u> The organization's approach to managing information security and its implementation including people, processes and technologies shall be reviewed independently at planned intervals, or when significant changes occur			X	X	Yes	Yes
A5.36	<u>Compliance with policies, rules and standards for information security</u> Compliance with the organization's information security policies, topic-specific policies, rules and standards shall be regularly reviewed.			X	X	Yes	Yes
A5.37	<u>Documented operating procedures</u> Operating procedures for information processing facilities shall be documented and made available to personnel who need them.			X	X	Yes	Yes
A6	People controls						
A6.1	<u>Screening</u> Background verification checks on all candidates to become personnel shall be carried out prior to joining the organization and on an ongoing basis taking into consideration applicable laws, regulations and ethics and be proportional to the business requirements, the classification of the information to be accessed and the perceived risks.	X		X	X	Yes	Yes
A6.2	<u>Terms and conditions of employment</u> The employment contractual agreements shall state the personnel's and the organization's responsibilities for information security.			X	X	Yes	Yes
A6.3	<u>Information security awareness, education and training</u> Personnel of the organization and relevant interested parties shall receive appropriate information security awareness, education and training and regular updates of the organization's information security policy, topic-specific policies and procedures, as relevant for their job function.	X		X	X	Yes	Yes
A6.4	<u>Disciplinary process</u> A disciplinary process shall be formalized and communicated to take actions against personnel and other relevant interested parties who have committed an information security policy violation.	X		X	X	Yes	Yes
A6.5	<u>Responsibilities after termination or change of employment</u> Information security responsibilities and duties that remain valid after termination or change of employment shall be defined, enforced and communicated to relevant personnel and other interested parties.			X	X	Yes	Yes
A6.6	<u>Confidentiality or non-disclosure agreements</u> Confidentiality or non-disclosure agreements reflecting the organization's needs for the protection of information shall be identified, documented, regularly reviewed and signed by personnel and other relevant interested parties.	X		X	X	Yes	Yes
A6.7	<u>Remote working</u> Security measures shall be implemented when personnel are working remotely to protect information accessed, processed or stored outside the organization's premises.	X		X	X	Yes	Yes
A6.8	<u>Information security event reporting</u> The organization shall provide a mechanism for personnel to report observed or suspected information security events through appropriate channels in a timely manner.	X		X	X	Yes	Yes
A7	Physical controls						
A7.1	<u>Physical security parameters</u> Security perimeters shall be defined and used to protect areas that contain information and other associated assets.			X	X	Yes	Yes
A7.2	<u>Physical access entry</u> Secure areas shall be protected by appropriate entry controls and access points.			X	X	Yes	Yes

A7.3	<u>Securing offices, rooms and facilities</u> Physical security for offices, rooms and facilities shall be designed and implemented.	X		X	X	Yes	Yes
A7.4	<u>Physical security monitoring</u> Premises shall be continuously monitored for unauthorized physical access.			X	X	Yes	Yes
A7.5	<u>Protecting against physical and environmental threats</u> Protection against physical and environmental threats, such as natural disasters and other intentional or unintentional physical threats to infrastructure shall be designed and implemented.			X	X	Yes	Yes
A7.6	<u>Working in secure areas</u> Security measures for working in secure areas shall be designed and implemented.			X	X	Yes	Yes
A7.7	<u>Clear desk' and 'clear screen'</u> Clear desk rules for papers and removable storage media and clear screen rules for information processing facilities shall be defined and appropriately enforced.			X	X	Yes	Yes
A7.8	<u>Equipment siting and protection</u> Equipment shall be sited securely and protected.			X	X	Yes	Yes
A7.9	<u>Security of assets off-premises</u> Off-site assets shall be protected			X	X	Yes	Yes
A7.10	<u>Storage media</u> Storage media shall be managed through their life cycle of acquisition, use, transportation and disposal in accordance with the organization's classification scheme and handling requirements.			X	X	Yes	Yes
A7.11	<u>Supporting utilities</u> Information processing facilities shall be protected from power failures and other disruptions caused by failures in supporting utilities.			X	X	Yes	Yes
A7.12	<u>Cabling security</u> Cables carrying power, data or supporting information services shall be protected from interception, interference or damage.			X	X	Yes	Yes
A7.13	<u>Equipment maintenance</u> Equipment shall be maintained correctly to ensure availability, integrity and confidentiality of information.			X	X	Yes	Yes
A7.14	<u>Secure disposal or re-use of equipment</u> Items of equipment containing storage media shall be verified to ensure that any sensitive data and licensed software has been removed or securely overwritten prior to disposal or re-use.			X	X	Yes	Yes
A8	<u>Technological controls</u>						
A8.1	<u>'User endpoint devices'</u> Information stored on, processed by or accessed via 'user endpoint devices' shall be protected.	X		X	X	Yes	Yes
A8.2	<u>Privileged access rights</u> The allocation and use of privileged access rights shall be restricted and managed.	X		X	X	Yes	Yes
A8.3	<u>Information access restriction</u> Access to information and other associated assets shall be restricted in accordance with the established topic-specific policy on access control.	X		X	X	Yes	Yes
A8.4	<u>Access to source code</u> Read and write access to source code, development tools and software libraries shall be appropriately managed.			X	X	Yes	Yes
A8.5	<u>Secure authentication</u> Secure authentication technologies and procedures shall be implemented based on information access restrictions and the topic-specific policy on access control.			X	X	Yes	Yes
A8.6	<u>Capacity management</u> The use of resources shall be monitored and adjusted in line with current and expected capacity requirements.			X	X	Yes	Yes
A8.7	<u>Protection against malware</u> Protection against malware shall be implemented and supported by appropriate user awareness.			X	X	Yes	Yes
A8.8	<u>Management of technical vulnerabilities</u> Information about technical vulnerabilities of information systems in use shall be obtained, the organization's exposure to such vulnerabilities shall be evaluated and appropriate measures shall be taken.			X	X	Yes	Yes
A8.9	<u>Configuration management</u> Configurations, including security configurations, of hardware, software, services and networks shall be established, documented, implemented, monitored and reviewed.			X	X	Yes	Yes
A8.10	<u>Information deletion</u> Information stored in information systems, devices or in any other storage media shall be deleted when no longer required.	X		X	X	Yes	Yes
A8.11	<u>Data masking</u> Data masking shall be used in accordance with the organization's topic-specific policy on access control and other related topic-specific policies, and business requirements, taking applicable legislation into consideration.	X		X	X	Yes	Yes
A8.12	<u>Data leakage prevention</u> Data leakage prevention measures shall be applied to systems, networks and any other devices that process, store or transmit sensitive information	X		X	X	Yes	Yes
A8.13	<u>Information backup</u> Backup copies of information, software and systems shall be maintained and regularly tested in accordance with the agreed topic-specific policy on backup.	X		X	X	Yes	Yes
A8.14	<u>Redundancy of information processing facilities</u> Information processing facilities shall be implemented with redundancy sufficient to meet availability requirements.				X	Yes	Yes
A8.15	<u>Logging</u> Logs that record activities, exceptions, faults and other relevant events shall be produced, stored, protected and analysed.			X	X	Yes	Yes
A8.16	<u>Monitoring activities</u> Networks, systems and applications shall be monitored for anomalous behaviour and appropriate actions taken to evaluate potential information security incidents.			X	X	Yes	Yes
A8.17	<u>Clock synchronization</u> The clocks of information processing systems used by the organization shall be synchronized to approved time sources.	X		X	X	Yes	Yes

A8.18	<u>Use of privileged utility programs</u> The use of utility programs that can be capable of overriding system and application controls shall be restricted and tightly controlled.			X	X	Yes	Yes
A8.19	<u>Installation of software on operational systems</u> Procedures and measures shall be implemented to securely manage software installation on operational systems.			X	X	Yes	Yes
A8.20	<u>Networks security</u> Networks and network devices shall be secured, managed and controlled to protect information in systems and applications.			X	X	Yes	Yes
A8.21	<u>Security of network services</u> Security mechanisms, service levels and service requirements of network services shall be identified, implemented and monitored.			X	X	Yes	Yes
A8.22	<u>Segregation of networks</u> Groups of information services, users and information systems shall be segregated in the organization's networks.			X	X	Yes	Yes
A8.23	<u>Web filtering</u> Access to external websites shall be managed to reduce exposure to malicious content.				X	Yes	Yes
A8.24	<u>Use of cryptography</u> Rules for the effective use of cryptography, including cryptographic key management, shall be defined and implemented.				X	Yes	Yes
A8.25	<u>Secure development life cycle</u> Rules for the secure development of software and systems shall be established and applied.				X	Yes	Yes
A8.26	<u>Application security requirements</u> Information security requirements shall be identified, specified and approved when developing or acquiring applications.			X	X	Yes	Yes
A8.27	<u>Secure system architecture and engineering principles</u> Principles for engineering secure systems shall be established, documented, maintained and applied to any information system development activities.			X	X	Yes	Yes
A8.28	<u>Secure coding</u> Secure coding principles shall be applied to software development.			X	X	Yes	Yes
A8.29	<u>Security testing in development and acceptance</u> Security testing processes shall be defined and implemented in the development life cycle.			X	X	Yes	Yes
A8.30	<u>Outsourced development</u> The organization shall direct, monitor and review the activities related to outsourced system development.			X	X	Yes	Yes
A8.31	<u>Separation of development, test and production environments</u> Development, testing and production environments shall be separated and secured.			X	X	Yes	Yes
A8.32	<u>Change management</u> Changes to information processing facilities and information systems shall be subject to change management procedures.			X	X	Yes	Yes
A8.33	<u>Test information</u> Test information shall be appropriately selected, protected and managed.	X		X	X	Yes	Yes
A8.34	<u>Protection of information systems during audits</u> Audit tests and other assurance activities involving assessment of operational systems shall be planned and agreed between the tester and appropriate management.			X	X	Yes	Yes
